α-cloud is a 1.5 yr R&D project at AU that will develop cloud infrastructure for education

FALL 2020 we need two test projects from CogSci, one from neuroscience and one from NLP!

requirements
- a project that takes more compute than your laptop $>$ one day
- run the project as a test project
- (acquire) basic knowledge of shell scripting
- deep neural nets with `tensorflow` or `torch`

opportunities
- to run large compute jobs interactively in your browser
- dedicated it-support
- experience with cloud infrastructure
- contribute to tomorrow's IT solution

THANKS
