COMPUTING AARHUS

RESEARCH IT

... provides research data and computing technologies in order to advance research through IT innovation.

Roles: Subject Matter Experts

SME :: An educator with deep knowledge and mastery of a particular domain

- facilitator of learning
- puts learning in a context
- engage the audience
- needs to be backed by technology and IT skills

ex. support can set up and explain an analytics engine, but you know how it impacts your field...

ROLES: SUPPORT TEAM

The support team is a resource that spans all partner universities

Provides support for

- technological components of course development
- development of simple tools for data extraction and analysis
- compute and data infrastructure
- data life cycle management

Examples

GO

technology consulting fo some course-specific task

extraction of some content from a database

student access to an application during a course

consulting on data formats (data and metadata) for re-use

co-develop or teach a module that introduces a technology

mediate communication with IT organization and infrastructure

NO-GO

develop or teach course content

design and develop custom software

HOW TO GET SUPPORT

`digital-curriculum-2` post on **support-112** OR dm to **support-<name>**

NB: support has limited resources, by default 15hrs/participant
NBB: support depends on availability

```python
if questions:
    try:
        answer()
    except RunTimeError:
        pass
    else:
        print('break')
```
